MARDS NA DANU ISTRAŽIVANJA UDG

Devetu godinu za redom Univerzitet Donja Gorica (UDG), u saradnji sa MONSTAT-om (Zavod za statistiku Crne Gore) i agencijom DAMAR (privatna agencija za istraživanje javnog mijenja), organizuje Dan istraživanja koji se tradicionalno održava 4. aprila na UDG..

Ovaj događaj pruža priliku za okupljanje značajnog broja naučno-istaživačkih institucija i istraživača iz Crne Gore. Pruža priliku široj javnosti, studentima osnovnih, magistarskih i doktorskih studija da se upoznaju sa istraživanjima koja se sprovode u Crnoj Gori, osim toga pruža i priliku za predstavljanje projektnih aktivnosti i istraživačkih radova.

Pored navedenih karakteristika, Dan istraživanja ima za cilj da podstakne i probudi veću svijest kada se govori o kvalitetu i stimulisanju naučno istraživačke djelatnosti, zatim promovisanje istraživanja crnogorskih naučnika, kao i umrežavanje sa regionalnim i međunarodnim inicijativama u oblasti nauke i društva, a prije svega stimulisanje i podsticanje mladih istraživača – talenata

Ove godine će u upravo u okviru Dana istraživanja na Univerzitetu Donja Gorica biti predstavljen projekat koji se odnosi na reformu doktorskih studija u Crnoj Gori i Albaniji, MARDS (Reforming doctoral studies in Montenegro and Albania – good practice paradigm). Projekat se finansira u okviru Erasmus + programa za izgradnju kapaciteta u oblasti visokog obrazovanja.

Svi prisutni na događaju će imati priliku da se upoznaju sa ciljevima istog i dosadašnjim ostvarenim rezultatima. Projekat je zvanično otpočeo u januaru 2019. godine i u toku je implementacija projektnih aktivnosti.

Projekat MARDS bavi se jednim od svakako najizraženijih izazova u crnogorskom i albanskom prostoru visokog obrazovanja – doktorskim studijama. Glavni cilj ovog projekta jeste da, u skladu sa Salzburškim principima, rekonstruiše i uspostavi održive i moderne zajedničke doktorske studije (Pilot Joint Doctoral Schools) između dviju prijateljskih partnerskih zemalja koje će služiti kao primjer dobre prakse za region Zapadnog Balkana

A kao krajnji rezultat ovog projekta će biti novi program doktorskih studija koji će biti koncipiran i razvijen u skladu sa EU standardima, trendovima i najboljim evropskim praksama. Dodatno će se uspostaviti saradnja sa EU centrima u procesu doktorskog obrazovanja, što će podrazumijevati mobilnost studenata i predavača. Takođe, projektom je izvršena nabavka opreme za laboratorije, kao i ostala infrastruktura koja će omogućiti studentima i akademskom osoblju da dodatno unaprijede istraživački rad.

MARDS
REFORMING PHD STUDIES

INTRODUCING MARDS PROJECT AT RESEARCH DAY

For the ninth consecutive year the University of Donja Gorica (UDG), in collaboration with MONSTAT (Statistical Office Montenegro) and DAMAR agency (private opinion polling agency) is organizing Research day which is traditionally held on the 4th of April at the University.

This event provides an opportunity to gather a significant number of scientific research institutions and researchers from Montenegro. It also allows the general public, students of bachelor, master's and doctoral studies to get acquainted with the research being conducted in Montenegro, and also gives them an opportunity to present their own work

In addition to this, Research Day aims to foster and raise awareness when it comes to the quality and stimulation of scientific research, with that promoting research by scientists from Montenegro, as well as networking with regional and international initiatives in the fields of science and society, and above all stimulating and encouraging young researchers – talents

This year in particular, during Research Day at the University of Donja Gorica a project on the reform of doctoral studies in Montenegro and Albania, named MARDS (Reforming doctoral studies in Montenegro and Albania - good practice paradigm), will be presented. The project is being implemented through the Erasmus + program within the capacity building program in the field of higher education.

Everyone present at this event will have the opportunity to hear more about the given project and its aims and goals.

The project officially began in January 2019 and the implementation of project activities is currently underway.

The MARDS project deals with one of the most prominent challenges in the Montenegrin and Albanian higher education areas - doctoral studies. The main objective of this project is to, in accordance with the Salzburg Principles, reconstruct and establish sustainable and modern (Pilot Joint Doctoral Schools) between the two friendly partner countries, which will then serve as an example of good practice for the Western Balkans region.

The results of this project will be a new PhD program that will be conceptualized and developed in accordance with EU standards, trends and best European practices. In addition, cooperation will be established with EU centers in the doctoral education process, which will imply the mobility of students and lecturers. The project also envisages the procurement of laboratory equipment, as well as other infrastructure that will allow students and academic staff to further enhance research work.
